

THE PLAYBOOK

# A REBA assessment by hand takes an hour.

Watch it happen in one video.

4 rules · 2 min read · save it

HOW IT WORKS

# One clip in

**Upload a 12-second video of a worker. AI Ergo tracks 36 skeletal joints and measures 10 body angles: neck, trunk, both arms, both wrists, both knees, every second.**

→ next: Systems in one pass

# 6

## Systems in one pass

REBA, RULA, NIOSH, Snook, HSE MAC and WISHA, all scored from the same clip.

→ next: Left and right, separately

WHAT YOU SEE

# Left and right, separately

Every posture is colour coded on the video from green to red, so you see the exact second a joint crosses into risk.

→ next: A score you can defend

WHY IT MATTERS

# A score you can defend

Every sub-score is exposed: neck, trunk, legs, load, coupling. Enough to stand behind in an audit.

**Assess every  
workstation, not just  
the one that  
already...**
